

LASYA MORAVINENI

Hyderabad, India — lasyamacs08@gmail.com — +91-7075769940 — LinkedIn — GitHub — Portfolio

TECHNICAL SKILLS

Programming & CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design Fundamentals, Problem-Solving
Languages: Java, Python, SQL, TypeScript, JavaScript
Backend: Spring Boot, FastAPI, REST APIs, Microservices, JSON Processing
AI / GenAI: Google Gemini, Claude, RAG, LangGraph, Model Context Protocol (MCP), Prompt Engineering
Distributed Systems: Apache Kafka, Kafka Streams, Event-Driven Architecture, WebSocket
Cloud & DevOps: AWS (Lambda, EC2, SNS), Docker, Jenkins, CI/CD, Git, GitHub
Databases: MySQL, PostgreSQL, SQLite, ChromaDB
Frontend: Angular, React, Next.js
Practices: Agile Development, SDLC, Code Reviews

EXPERIENCE

Software Engineer Trainee Aug 2025 – Aug 2026
Cisco Systems, Inc. — Hyderabad, India

- Designed and built backend microservices for enterprise-scale applications using **Java, Spring Boot, SQL, and REST APIs**, taking broadly-defined requirements through design, coding, testing, and debugging.
- Designed and implemented **10+ RESTful API** endpoints supporting distributed service communication across production systems.
- Built event-driven, asynchronous workflows using AWS Lambda and SNS to automate backend processing at scale, improving system reliability and reducing manual overhead.
- Built an internal Release Builder tool that programmatically transformed unstructured documents and CSV inputs into structured JSON, cutting documentation effort by approximately **70%**.
- Collaborated with cross-functional teams in an Agile environment, contributing to technical documentation and knowledge sharing to support ongoing development.
- Troubleshooted and resolved production issues under guidance, continuously learning new tools and frameworks.

PROJECTS

DocuMind AI v1.2.0 – Agentic RAG Platform *Python, FastAPI, LangGraph, Google Gemini, ChromaDB, Next.js*

- Designed a **LangGraph**-orchestrated agentic workflow (a Planner → Retriever → Validator StateGraph with conditional routing and bounded retries) on top of a hybrid (semantic + BM25) retrieval system over **ChromaDB**.
- Implemented **evidence-aware response generation** and validation, routing queries based on retrieved evidence and preventing unsupported answers when the available context is insufficient.
- Applied system design principles to keep the upgrade backward compatible, shipping through a full release cycle with **24 passing automated tests** and a tagged production release.

Real-Time Log Processing System *Apache Kafka, Kafka Streams, Spring Boot, Angular, WebSocket*

- Designed and built a distributed, **microservices**-based monitoring platform capable of processing thousands of streaming log events, applying distributed application concepts and asynchronous, event-driven processing patterns.
- Designed scalable messaging pipelines using **Apache Kafka** and **Kafka Streams** with a **Spring Boot** backend, focusing on reliability and fault tolerance under high event throughput.
- Built a real-time **Angular** frontend with WebSocket-based dashboards, giving users near real-time visibility into system activity and operational health.

Full-Stack Movie Booking and CI/CD Platform *Spring Boot, MySQL, Docker, Jenkins, AWS EC2, Nginx*

- Designed and developed a full-stack movie booking platform using **Angular** and **Spring Boot**, implementing authentication, movie/show management, seat allocation, booking, cancellation, and booking history.
- Designed and implemented **10+ RESTful APIs** with Spring MVC and JPA/Hibernate, backed by a normalized MySQL schema for transactional movie, show, seat, user, and booking data.
- Containerized and deployed the application on **AWS EC2** using **Docker** and **Nginx**, with environment-driven database configuration, persistent **MySQL** storage, and restricted backend exposure through a reverse proxy.
- Built a **Jenkins CI/CD pipeline** to automate backend Maven builds, Docker image creation, Angular production builds, application deployment, and post-deployment API verification.

EDUCATION

B.Tech - Computer Science and Engineering (AI & ML) 2020 – 2024
CMR Institute of Technology, Hyderabad CGPA: 8.73/10

CERTIFICATIONS

- Cisco Certified AI Technical Practitioner – Cisco, 2026
- AWS Certified AI Practitioner – AWS Training and Certification, 2026
- Microsoft Azure AI Fundamentals (AI-901) – Microsoft, 2026
- AWS Certified Cloud Practitioner – AWS Training and Certification, 2026
- Cisco Certified Network Associate (CCNA) Automation – Cisco, 2026
