Hyderabad, India — lasyamacs08@gmail.com — +91-7075769940 — LinkedIn — GitHub — Portfolio

PROFESSIONAL SUMMARY

Software Engineer Trainee at Cisco with experience building scalable backend systems, AI-powered applications, and cloud-native services using Java, Spring Boot, Python, FastAPI, REST APIs, and AWS. Hands-on experience designing Retrieval-Augmented Generation (RAG) systems, Google Gemini integrations, hybrid retrieval pipelines, and provider-agnostic AI architectures. Strong foundation in distributed systems, microservices, secure API development, cloud deployment, and full-stack software engineering.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Backend: Spring Boot, FastAPI, REST APIs, Microservices, Spring MVC, JSON Processing, JWT Authentication
AI / LLM: Google Gemini, Ollama, Retrieval-Augmented Generation (RAG), Hybrid Retrieval, ChromaDB, MCP, Prompt Engineering, Agent-Orchestrated AI Workflows
Frontend: Next.js, React, Angular, Tailwind CSS
Databases: PostgreSQL, SQLite, MySQL, ChromaDB
Cloud & DevOps: AWS (Lambda, EC2, SNS), Docker, Jenkins, Git, GitHub, CI/CD, Render, Vercel
Messaging: Apache Kafka, Kafka Streams
Tools: Postman, Jira, Agile Development

EXPERIENCE

Software Engineer Trainee (Apprentice) **Aug 2025 – Present**
Cisco Systems, Inc. — Hyderabad, India

- Developed backend microservices and enterprise applications using Java, Spring Boot, SQL, REST APIs, and AWS.
- Designed and implemented 10+ secure RESTful API endpoints supporting distributed service communication.
- Built backend services following microservices architecture using Spring Boot, JSON, and asynchronous communication patterns.
- Implemented event-driven workflows using AWS Lambda and SNS for scalable background processing and notifications.
- Developed an MCP-based AI Calendar Tool integrating Claude with enterprise services through secure backend APIs.
- Built an AI-powered Release Builder that transformed unstructured documents and CSV inputs into structured JSON, reducing documentation effort by approximately 70%.
- Collaborated in Agile teams through API development, debugging, code reviews, testing, and production support.

PROJECTS

DocuMind AI – AI Document Intelligence Platform *FastAPI, Next.js, Google Gemini, RAG, Ollama, Render, Vercel*

- Designed and developed a full-stack AI document intelligence platform supporting interchangeable local (Ollama) and cloud (Google Gemini) inference through a provider-agnostic architecture.
- Built an agent-orchestrated Hybrid Retrieval (Semantic + BM25) pipeline with grounded responses, document chunking, duplicate detection, metadata extraction, and AI-powered summarization.
- Implemented secure JWT authentication, production demo-user bootstrap, environment-controlled registration, and protected REST APIs.
- Deployed the application using Render and Vercel with Google Gemini 2.5 Flash Lite and Gemini Embeddings for cloud inference while maintaining a fully offline local execution path.

AI-Integrated Calendar Automation Tool *Python, MCP, Claude, REST APIs*

- Developed an AI-powered calendar assistant integrating Claude with external enterprise services through the Model Context Protocol (MCP).
- Built secure REST integrations enabling structured tool invocation, response handling, and workflow orchestration.
- Designed reusable backend components supporting LLM-driven automation across multiple enterprise workflows.
- Applied prompt engineering and secure API design while integrating AI capabilities into backend services.

Real-Time Log Processing System *Apache Kafka, Kafka Streams, Spring Boot, Angular, WebSocket*

- Developed a distributed real-time monitoring platform capable of processing thousands of streaming log events.
- Designed scalable event-driven processing pipelines using Apache Kafka and Kafka Streams.
- Implemented WebSocket dashboards providing near real-time operational visibility.
- Improved backend scalability and asynchronous communication through stream-processing architecture.

EDUCATION

B.Tech - Computer Science and Engineering (AI & ML) **2020 – 2024**
CMR Institute of Technology, Hyderabad CGPA: 8.73/10

CERTIFICATIONS

- AWS Certified AI Practitioner – AWS Training and Certification, 2026
- AWS Certified Cloud Practitioner – AWS Training and Certification, 2026
- Java Full Stack Development Program – Cisco and Simplilearn, 2026
